Instructor	Text Responses
	Question: Comments on course effectiveness
	I enjoyed having the creative freedom to write in our own style while have parameters to work with.
	We did exercises where we composed things very quickly and it taught us to make fast decisions. He also showed many many examples that we could learn from & had many handouts that had very good advice.
	Question: Instructor Comments
DAHN	Very open discussions. He respected our opinions and encouraged discussion. Very good handouts and great explanations for each of them. Treated us like real composers and never talked down to us.

Instructor	Text Responses
	Question: Comments on course effectiveness
	assignments were tough, but i was able to apply concepts learned from text and supplemental materials to learn and understand content.
	I feel like i am coming away from this class more confused about music theory then before i went into the class. I didn't feel like it was irrelevant to my major (i would never teach a student of mine to sing ANY of this stuff)
	The text book is written like a technical manual for someone that has already been doing this type of theory for years and should already know the material. Because of this read the book ahead of time was completely useless in preparation for homework assignments and tests. The pace of the class should be much slower. Many in my section did not understand half of the material and were so lost that they didn't even know where to begin asking questions.
	This course was a lot of work. Sometimes it felt like we were expected to do something as if we've been doing it for years, not looking at it for the first time. It would have been nice to cut the work load in half. I feel I would have learned more. Still a good course, though. thanks.
	I wouldn't put so much grading weight on attendance.
	Having additional handouts that explained normal order and prime order in clearer terms was helpful. The 12-tone invention was fun. I wish we would have spent more time on the metric modulation section. There were things I didn't understand fully.
	Many many examples of 20th Century music that we listened to was a great way to learn about the music of this time period. Lots of class discussion and group work helped guide us through the interesting music of the 20th Century.
	Question: Instructor Comments
DAHN	a good pace learning material. challenging yet effective instruction.

DAHN	Dr. Dahn is very passionate about the subject, but his knowledge of the theory was a downside when trying to help those of us who had never encountered this before. He would move so quickly through complex concepts that were easy for him, but were brand new for us that many of us were completely lost. It felt that he expected us to be able to do extremely difficult analysis of scores that were so complex that we didn't even know where to start. The expectation of doing 30 measures of analysis for the file when the midterm required only 13 was completely unreasonable, time consuming, and beyond what should be expected of an introductory class. The homework was also extremely difficult, some times taking 10 -15 hours to complete outside of class. For a three credit class, I feel the workload was entirely unbalanced.
DAHN	Great instructor. Never met an instructor so available to help. Thanks!
DAHN	Appreciated the time he took to help us understand the concepts of 12-tone compositions. Appreciated that extra time he took to find materials that helped in understanding the material presented in class.
DAHN	He treated us like colleagues instead of students. He respected our opinions and encouraged class discussion. He showed many examples that were extremely applicable to the material that was being learned at the time & was very cautious about making sure we knew the material before moving on to the next subject/lesson.

Instructor	Text Responses
	Question: Comments on course effectiveness
	I liked how we followed along with the book so we could go back and look at it for a refresher. I don't think we needed as many printouts of pieces as we did because I ended up with all this music in my folder that we only spent 5 minutes looking at and didn't need to keep. I really liked the 12 tone invention project, it helped a lot with thinking about different row forms. I didn't think the percussion project was as helpful for learning concepts and it was stressful to have to record it with a group.
	Question: Instructor Comments
DAHN	Prof. Dahn does an excellent job of explaining new concepts in a clear and organized way. He cares about student's success and is good about listening to their questions and ideas.

Instructor	Text Responses
	Question: Comments on course effectiveness
	I liked the tex that we used. Dr. Dehn was a great teacher at explaining difficult concepts.
	Dr. Dahn pulled extra sources along with the textbook required to aid us in learning the concepts. I did not like the textbook that was used as it often had typos, and contradicted some of the material that had come before it.
	All homework should be assigned in class not through email midweek.
	Question: Instructor Comments
DAHN	His ability to connect with the students was terrific. I appreciated that he stopped and explained when people did not understand.
DAHN	I sometimes had a hard time following some of the topics taught. I really liked the worksheet we were told to work on in class separately and then we could ask questions throughout the class time. I also really appreciated all the outside help that Luke gave us. I met with him several times and he was always willing to sit down with me and explain things.
DAHN	Dr. Dahn was always willing to give extra help. He also would revisit difficult concepts if we needed it.
DAHN	Luke Dahn was an engaging and enjoyable teacher. He made dry material interesting and was always available and willing to help.
