Used the textbook much more than the anthology... seems like the anthology might be a good add-on rather than a requirement. I Liked the book ! I found the explanations in this book better than those in the previous Music theory book (Complete Musician – Laitz).

This is a very interesting and engaging course. It is super useful to those trying to be musicians.
I loved this course. After the first three semesters of Music Theory I thought I knew it all, but I was completely wrong. I found this course easier than 3 semester music theory.

I would recommend this instructor.

Please explain:

Comments Very supportive and always has multiple ways of helping answer questions. Very knowledgable in the subject, brings treats.

Dr. Dahn has been the best theory professor I've had. His passion for music and composition is clearly evident and definitely influences his teaching. He is always engaging and well–prepared. He listens to students' concerns and ideas and creates a welcoming space for sharing these. He works with us and genuinely wants to find ways to help us all succeed, learn, and develop an interest in music theory.

Professor Dahn is a nice guy and was always willing to help and answer questions. He explained the subject matter clearly and really knows his stuff. Assignments were assigned in a timely fashion and fairly graded. The tests accurately reflected the subject matter and were also fairly graded. His sense of humor was also greatly appreciated. I looked forward to every class. Thanks for a great class I learned a lot !

In general, I prefer individual over group projects when it comes to composition. I'm no composer but I have very strong and often unconventional musical ideas and opinions. However, all of the projects were great learning experiences and were very fun.

This was a great class ! Loved it !

Great course! I subject matter was fascinating, and the course was set up well and very organized. Each assignment and lecture
was designed to prepare us for the next, and I always felt like I had the tools and knowledge I needed to progress in the course.

I would recommend this instructor.
